Experience

Employment

- **Koding Inc.**
Cloud Development Environment *Senior Developer, Full-Time*

July 2012 - Present

www.koding.com

Working on front-end and back-end technologies for koding.com. Using CoffeeScript, JavaScript, Mongo and The Koding Framework.

- **Sigma Research & Development**
Computer Vision *Senior Developer, Full-Time*

January 2012 - June 2012

www.sigmard.com

Keywords are computer vision, computer graphics and game development. Working with C++, Qt, OpenNI.

- **Tübitak** The Scientific and Technological Research Council of Turkey
Pardus Project Developer *Full-time Researcher*

April 2006 - December 2011

www.tubitak.gov.tr

I have designed and developed most of user interface in Pardus. From top to bottom I developed Pardus installer YALI (*Yet Another Linux Installer*) and management interfaces of Pardus: Service-Manager, Network-Manager, Disk-Manager, User-Manager, Firewall-Manager and Package Manager. Created lots of other interfaces for Pardus Technologies. These are mainly developed with Python, Qt and KDE Libs.

- **Octeth Ltd.**
Web Technologies *Senior Developer, Part-Time*

February 2007 - November 2007

www.octeth.com

I have developed an RSS Plug-in for Octeth's main product Oempro which provides customers to use RSS links as newsletter source. Besides of some bugfixing on the product I also worked for e-mail engine of OemPro to increase e-mail sending speed at once. Used PHP and Python for all these.

- **PC World Turkey**
Open Source News *Part-time Journalist*

May 2004 - June 2005

www.pcworld.com.tr

I wrote news and open source application reviews once a month. I also worked for a web-based solution to get-things-done between the editors and the journalists which is used internally.
